

La familia Centinela, es una valla de configuración telescópica, por lo que se adapta a espacios escalonados y así conservar la horizontalidad en su cumbre.

Permite poner tantas luminarias LED como sean necesarias o deseadas, iluminando y protegiendo accesos, propiedades, interiores de jardines de hoteles, espacios residenciales, etc.

Centinela family, is a telescopic fence, to fit into staggered spaces. This will keep the horizontal effect as high as possible. This avoids staggered peaks.

Centinela allows you to place as many LED lights as you need or want, illuminating and protecting entrances, properties, hotel garden interiors, residential spaces, etc.

Centinela
